FEEDBACK

TRAINING THE CLINICAL ANATOMY TRAINER – LEVEL 1 (CERTIFIED COURSE)

20TH OCTOBER 2013

POSTGRADUATE CENTRE, ROYAL LIVERPOOL UNIVERSITY HOSPITAL, LIVERPOOL

This course was attended by 24 medical students and junior doctors. The course was intended to provide the attendees with a sound understanding of applied clinical anatomy pertinent to the level of senior medical students & foundation doctors. The course was predominantly delivered through surface anatomy demonstrations as applied to trauma, assessment of nerve injuries, surgical incisions, and the anatomy encountered during common operative procedures. The interactive focus group workshops covered the fundamental principles of local and regional anaesthetics, essential concepts in wound healing, and an overview of sutures & suture materials. Successful completion of the course required the attendee obtaining 70% marks in the above areas, which were formally assessed in the form of spotters, OSCE and viva-voce. It was intended that on completion of this course the attendee would have sufficient knowledge & understanding to teach their juniors in a formal manner.

COURSE PROGRAMME

0815 – 0830	Registration
0830 – 0845	Introduction to the course and format
0845 – 0910	Pre-Course Assessment
0910 – 0920	Discussion and Answers to Pre-Course Assessment
0920 - 0950	Brachial plexus and arm
0950 - 1010	Shoulder, scapula and rotator cuff
1010 - 1040	Cubital fossa, forearm, flexor retinaculum and hand
1040 – 1100: Break for refreshments	
1100 - 1120	Scalp and face
1120 - 1145	Neck
1145 - 1155	Thoracic wall
1155 - 1210	Mediastinum, Heart and Lungs
1210 - 1230	Vascular anatomy of thorax, head and neck and thorax
1230 - 1245	Diaphragm, back and Spinal Cord
1245 – 1320: Lunch	
1320 - 1340	Wound healing and sutures
1340 - 1350	Local anaesthetics
1350 - 1415	Transpyloric plane, anterior abdominal wall and inguinal region
1415 - 1440	Abdominal and pelvic anatomy
1440 - 1450	Lumbar and lumbosacral plexus
1450 - 1510	Femoral triangle, thigh, popliteal fossa
1510 - 1540	Lower leg, ankle and foot
1540 - 1610	Theory Evaluation
1610 - 1810	Individual viva [along with refreshments and feedback]
1810	End of Course

FEEDBACK

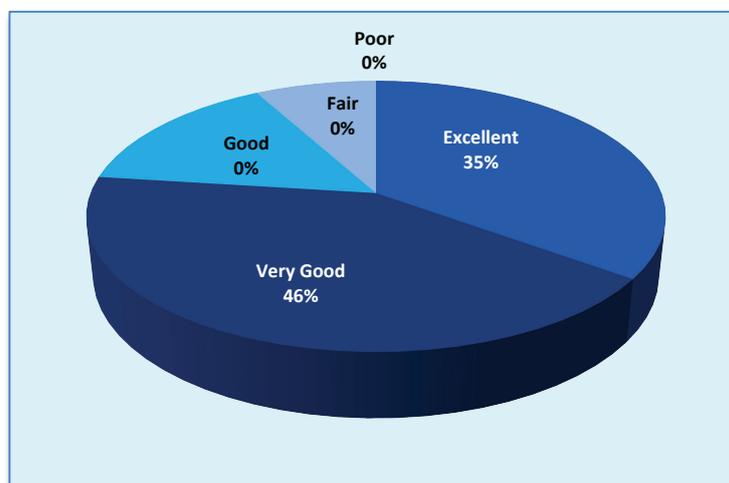

How was the overall content of the course?

How would you rate the academic standard and knowledge of the lecturer?

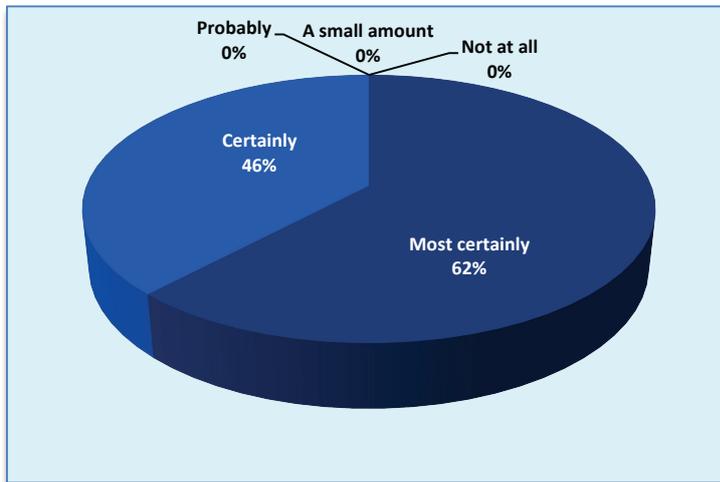

How was the clarity of demonstrations and presentations?

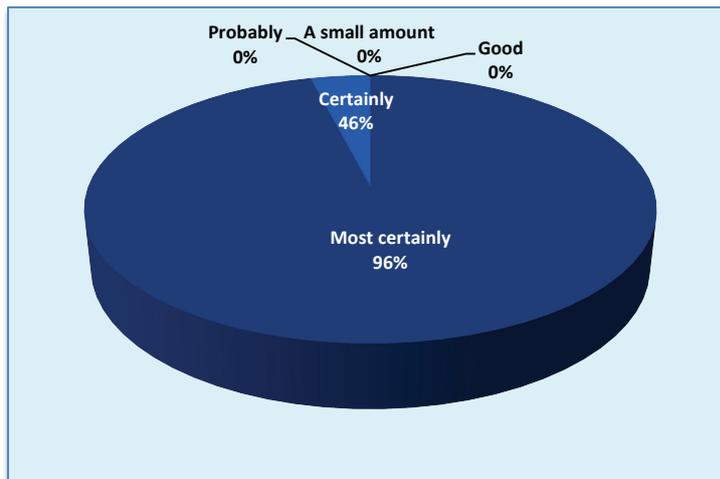

FEEDBACK

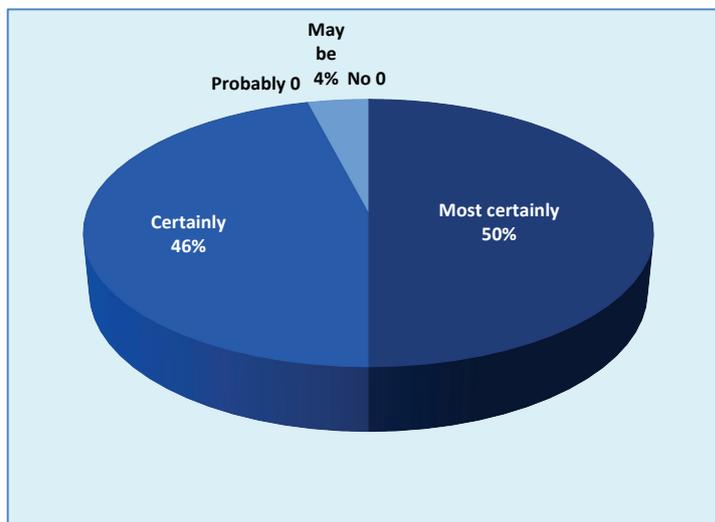

Do you feel that you enhanced your anatomy knowledge by attending the day?

Did the course provide you with an overview of anatomy pertinent to your study/work?

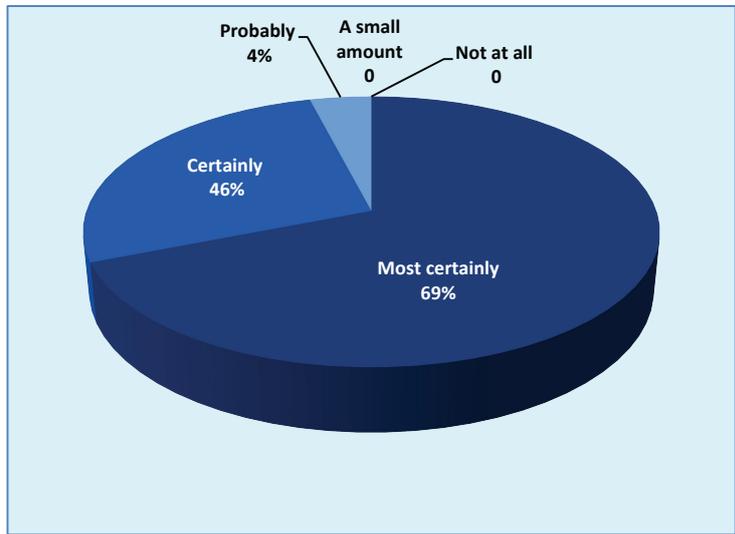

Would you recommend this course to a friend?

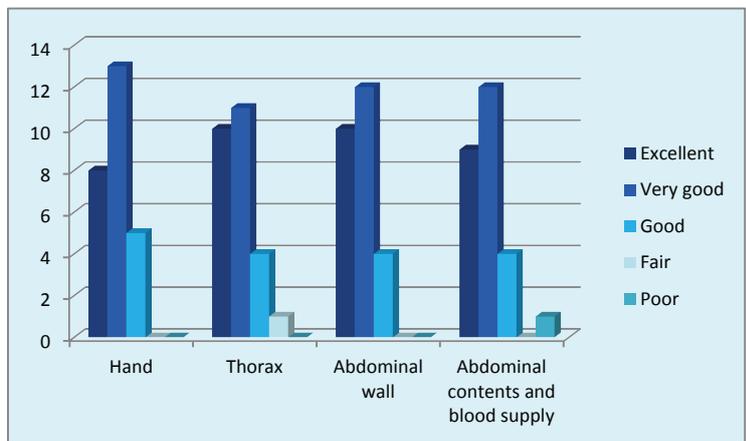

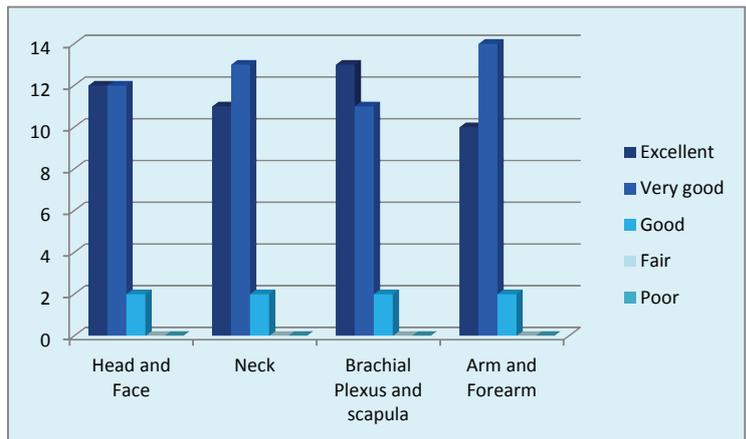

FEEDBACK

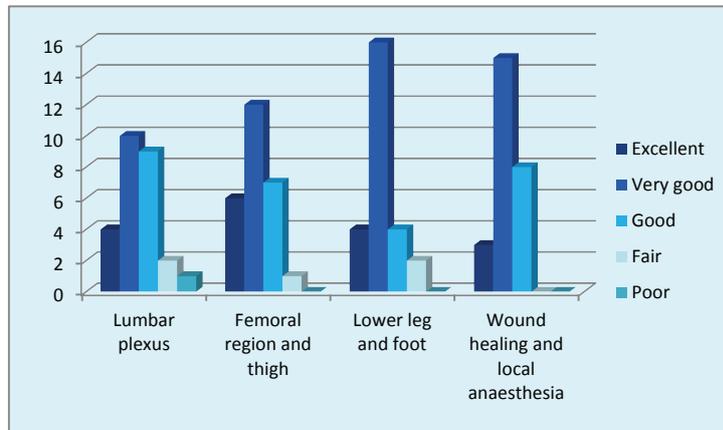

Do you think that this course provided good value for money?

FEEDBACK

COMMENTS

Excellent effort

Dr Amitabh Thacoor
St James's University Hospital, Leeds

Thorough

Dr Christine Angeline Mitoko
Royal Blackburn Hospital, Blackburn

Excellent teaching and a very useful interactive programme

Dr Virjen Patel
University of Liverpool, Liverpool

Extremely well organised

Faluade Akinroye
Royal Liverpool University Hospital, Liverpool

I very much enjoyed the course and the live anatomy demonstration was very useful. Overall an informative and challenging day.

Dr Rajveer Singh Thethi
St James's University Hospital, Leeds

It was good and worth my time.

Dr Lin Mathew John
Blackpool Victoria Hospital, Blackpool

Good course. Well run. It would be useful to tell candidates to revise thoroughly before attending as there is a lot of material to cover in a short space of time.

Dr Nichola Coleman
Blackpool Victoria Hospital, Blackpool

Tutor was very knowledgeable and was comfortable answering any questions we had

Maheswarareddy Eevuri
University of Liverpool, Liverpool

Would recommend doing the course over 2 days due to the vast amount of content to be covered.

Dr Michael Bonnici Mallia
Royal Blackburn Hospital, Blackburn

Very good, but a lot to get through in one day. As one of the more junior attendees I felt having the course over two days would have helped me get a lot more from it

Mr Tom goldsmith
University of Liverpool, Liverpool

Even if I do not pass the examination, I feel that the course has been very valuable as my knowledge of anatomy has increased significantly. Mr Enoch was very friendly and an excellent teacher

Dr Sobia Akhtar
Huddersfield Royal Infirmary, Huddersfield

COMMENTS

A very good course, relevant and interesting, but very fast paced.

Miss Anintitha Boon-Itt
University of Liverpool, Liverpool

Very good.

Dr Wah Phin Lee
Whiston Hospital, Prescot

Very good course which has improved my anatomy knowledge greatly however parts of the course I felt were at times rushed particularly the lower limb!

Mr Chad Harris
University of Liverpool, Liverpool

Very useful as it was a long time since I did anatomy. I do however feel that we needed longer to read the pre course materials. Also think that it was a very large amount of information to cover in just a day, would be more appropriate split over two days into limbs/neck and then torso. I did find that because we went through stuff very quickly I had forgotten things from the morning by the afternoon time. If it was stretched out across two days it might help people retain the information better long term.

Dr Katharine Hamlett
Royal Albert Edward Infirmary, Wigan

The pre-course presentations were excellent and the handbook was very good. The day was very long and intense but there was no way to avoid this really. I found the work I did leading up to the day helped me a lot in my studies and I learnt on the day too, things relevant to my clinical practice. I have recommended this course to my colleagues.

Miss Hannah Mulgrew
University of Liverpool, Liverpool

Useful course. Cheap. Would have liked more on nerve blocks and anaesthesia.

Dr Naresh Rajasekar
Leeds General Infirmary, Leeds

Very relevant, concise, and beneficial for me.

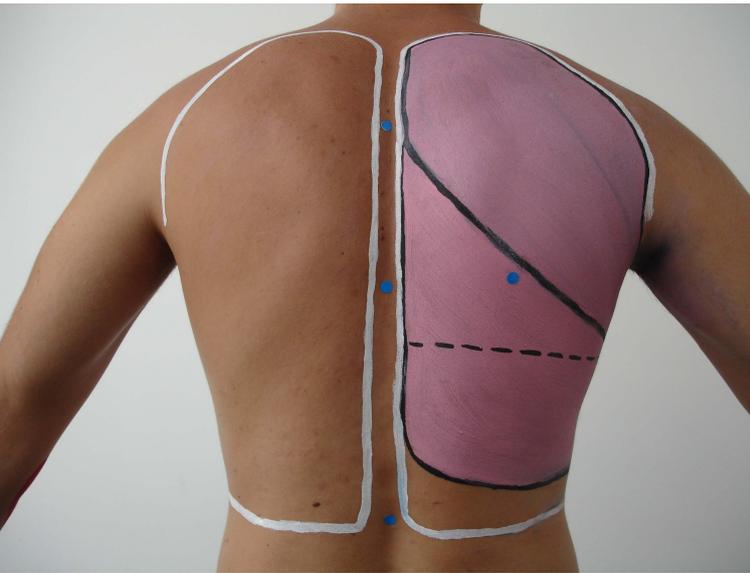

Mr Dheemanth Vangimalla
University of East Anglia, United Kingdom

I enjoyed the course very much

Dr Michael Ghisel
Derriford Hospital, Plymouth
