A Focused Case-Based Discussion Series on Common Orthopaedic Conditions and Emergencies: For Clinical Practice and MRCS Exams (for FYs and CTs)

This series of 15 succinct structured webinars conducted between November 2022 – May 2023 was intended to provide foundation year and core trainees in surgery a comprehensive overview of orthopaedic conditions and emergencies that are relevant at that stage of training. In addition to providing the knowledge required for clinical practice, the teaching sessions were also useful for those appearing for MRCS A and MRCS OSCE exams in 2023. All sessions had CPD points (one point per session), and were based on the current practice guidelines including ATLS, NICE and BOAST, as well as the CST curriculum.

Delegates could register for the full series or the individual sessions.
