Cardiff MRCS Course: Surgical Anatomy, Pathology and Critical Care Physiology for MRCS OSCE

This intensive one-day course covered the 'knowledge component' that makes up 120 marks (6 stations) in the restructured MRCS OSCE for the May 2021 sitting (13 stations in total). It covered the commonly tested and high-yield topics in anatomy, pathology, microbiology, and applied basic sciences and critical care physiology. This course provided a solid revision of knowledge and a sound transition from the MRCS Part A to the MRCS OSCE in May 2021

The day was calculated to be equivalent to 35 hours of individual revision.

This attendance course was delivered to a small group of delegates and complied with the Health Authority and Government guidelines for social distancing and other appropriate measures.
