Feedback - September 2015

Intensive Surgical Anatomy Revision for MRCS Part B OSCE

This intensive one-day revision course provided an intense and pertinent revision of all subject areas tested in the MRCS exam to aid in the consolidation of a delegate's core and applied knowledge in anatomy. It also aided the delegate's aptitude to prepare for viva-voce and OSCE stations, with an emphasis on helping delegates deal with viva/OSCE in a systematic manner.

Demonstrations were made using anatomical prosections and cross-sections. Along with small groups tutorials in osteology, topographic and surface anatomy, with the use of radiographs and other relevant imaging to aid understanding.
