

National Core Surgical Training Interview Course

Feedback - January 2022

National Core Surgical Training Interview Course

This one-day virtual interview course provided delegates with knowledge and mock interview practice in order to help them prepare for the core surgical interviews held in 2022.

The course focussed on providing rigorous mock interview practice, which was facilitated by the high faculty-to-delegate ratio. Detailed personalised feedback for each station was given to help delegates realise their strengths and the areas in which they could improve.

This course was moved onto a virtual platform in keeping with changes to the core surgical interview process at the national level. This gave delegates an experience that mimicked the real interview process as far as possible.

Individual Comments

Plenty of cases to practice.

It was suitable for my level. Tutors were highly experienced surgical trainees who had been through the process. High tutor to delegate ratio makes it very helpful to gain critical feedback.
