

Training the Clinical Anatomy Trainer – Level 1 (Certified Course)

3RD NOVEMBER 2013

BARTS AND THE LONDON SCHOOL OF MEDICINE AND DENTISTRY, WHITECHAPEL, LONDON

FEEDBACK

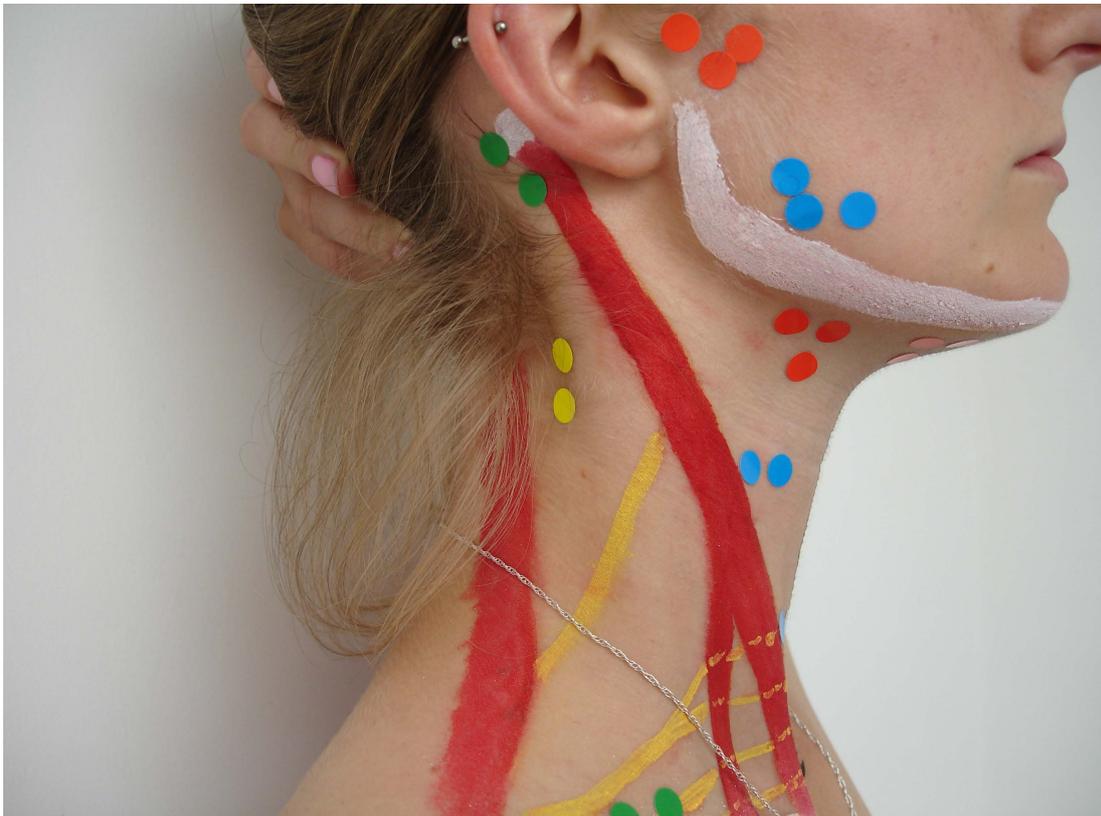

TRAINING THE CLINICAL ANATOMY TRAINER – LEVEL 1 (CERTIFIED COURSE)

3RD NOVEMBER 2013

BARTS AND THE LONDON SCHOOL OF MEDICINE AND DENTISTRY, WHITECHAPEL, LONDON

Taught by surgeons, this 'Clinical Anatomy Trainer Level 1' course was intended to provide delegates with a sound understanding of applied clinical anatomy pertinent to senior medical students and foundation doctors. The course was predominantly delivered through surface anatomy demonstration as applied to trauma, assessment of nerve injuries, surgical incisions, & the anatomy encountered during common operative procedures. The interactive focus-group workshops also covered the fundamental principles of local and regional anaesthetics, essential concepts in wound healing, and an overview of sutures and suture materials. Successful completion of the course required the delegate obtaining 70% marks in the above areas, which were formally assessed in the form of spotters and viva-voce. It was intended that on completion of this course they will have sufficient knowledge & understanding to teach their juniors in a formal manner. Successful candidates were provided with a teaching certificate to validate this. From the 30 attendees, 63% attained sufficient marks in the assessment and achieved the competency to be awarded the certificate.

The delegates seem to have enjoyed and benefitted from the day, as reflected in the feedback in the subsequent pages.

COURSE PROGRAMME

0815 – 0830	Registration
0830 – 0845	Introduction to the course and format
0845 – 0910	Pre-Course Assessment
0910 – 0920	Discussion and Answers to Pre-Course Assessment
0920 - 0950	Brachial plexus and arm
0950 - 1010	Shoulder, scapula and rotator cuff
1010 - 1040	Cubital fossa, forearm, flexor retinaculum and hand
1040 – 1100: Break for refreshments	
1100 - 1120	Scalp and face
1120 - 1145	Neck
1145 - 1155	Thoracic wall
1155 - 1210	Mediastinum, Heart and Lungs
1210 - 1230	Vascular anatomy of thorax, head and neck and thorax
1230 - 1245	Diaphragm, back and Spinal Cord
1245 – 1320: Lunch	
1320 - 1340	Wound healing and sutures
1340 - 1350	Local anaesthetics
1350 - 1415	Transpyloric plane, anterior abdominal wall and inguinal region
1415 - 1440	Abdominal and pelvic anatomy
1440 - 1450	Lumbar and lumbosacral plexus
1450 - 1510	Femoral triangle, thigh, popliteal fossa
1510 - 1540	Lower leg, ankle and foot
1540 - 1610	Theory Evaluation
1610 - 1810	Individual viva [along with refreshments and feedback]
1810:	End of Course

ORGANISING COMMITTEE

Mr Kanay Lakhani

President - Barts and The London Anatomy Society

4th year medical student

iBSc Human Anatomy, Kings College London

General Secretary - National UG Conference for Clinical Anatomy [2013]

Mr Shehzad Kiani

Senior Committee Advisor

4th year medical student

iBSc Cellular and Molecular Medicine, Bristol University

Ex-President of BL Anatomy Society [2012-2013]

Vice Chair - National UG Conference for Clinical Anatomy [2013]

Mr Abdullatif Aydin

Events Coordinator

Final year medical student

iBSc Human Anatomy, Kings College London

Chair - National UG Conference for Clinical Anatomy [2013]

Miss Anum Pervez

Senior Committee Advisor

Final year medical student

iBSc Human Anatomy, Kings College London

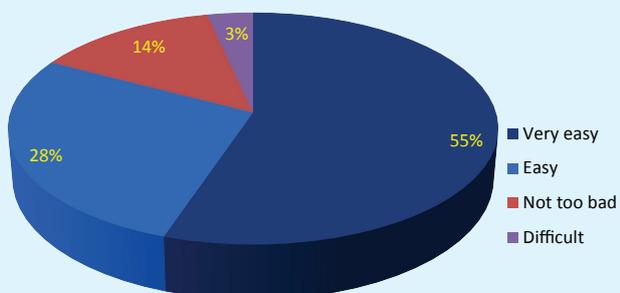

Ex-President of BL Anatomy Society [2011-2012]

Vice Chair - National UG Conference for Clinical Anatomy [2013]

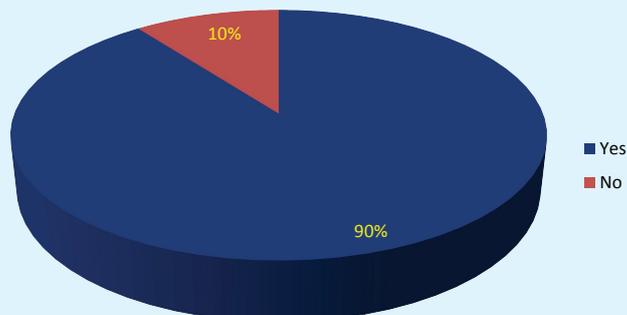

FEEDBACK

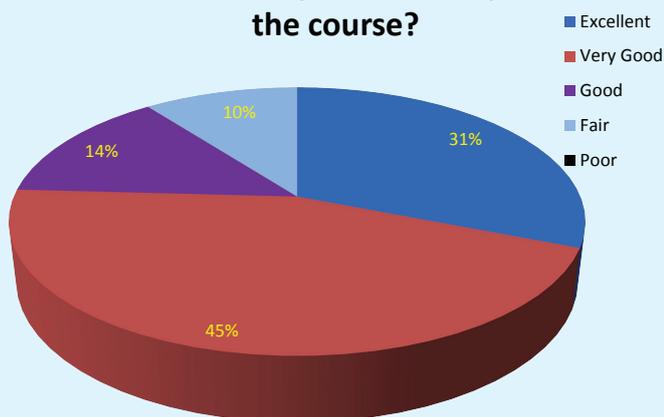

How easy was it to register and pay for the course?

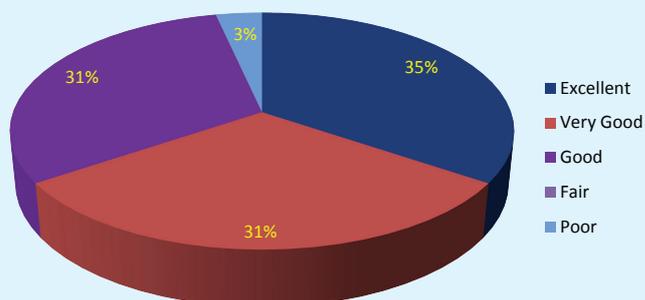

Did you receive an acknowledgement/confirmation email within 72 hours of payment?

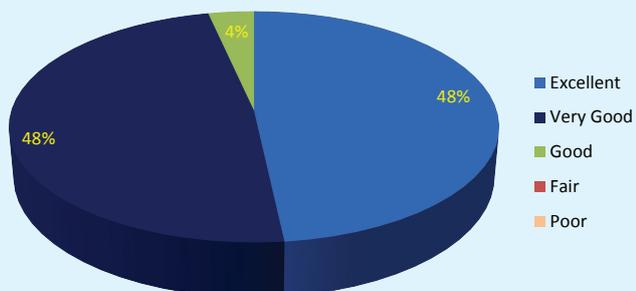

How would you rate the information and the emails you received prior to the course?

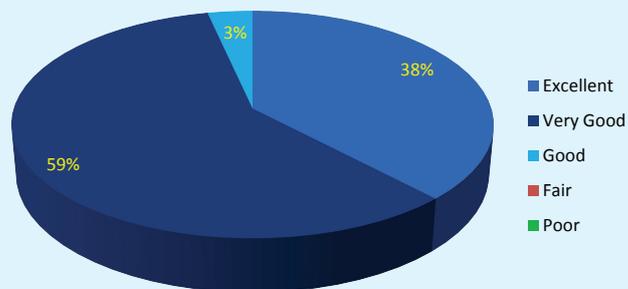

How useful was the pre-course online reading material and course manual?

How was the overall content of the course?

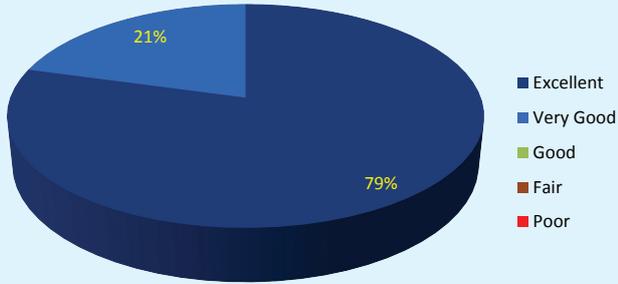

How was the clarity of demonstrations and presentations?

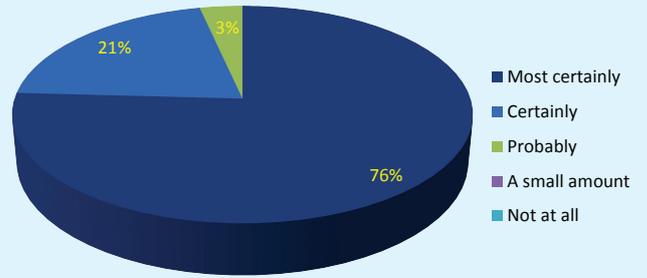

FEEDBACK

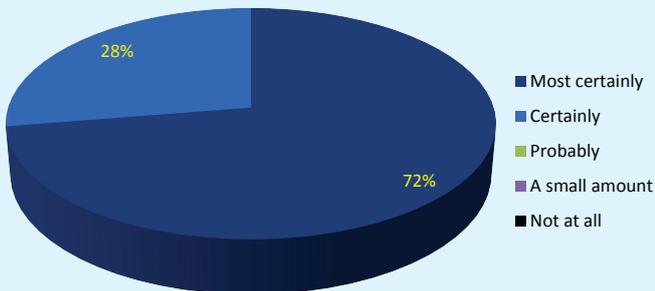

How would you rate the academic standard and knowledge of the lecturer?

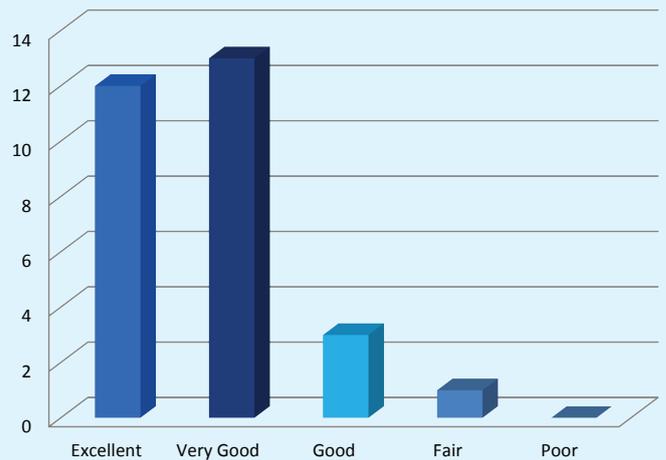

Do you feel that you enhanced your anatomy knowledge by attending the day?

Did the course provide you with an overview of anatomy pertinent to your study/work?

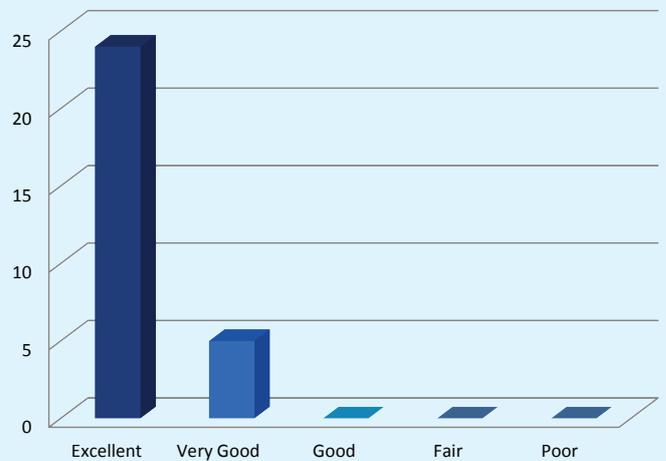

Head and Face

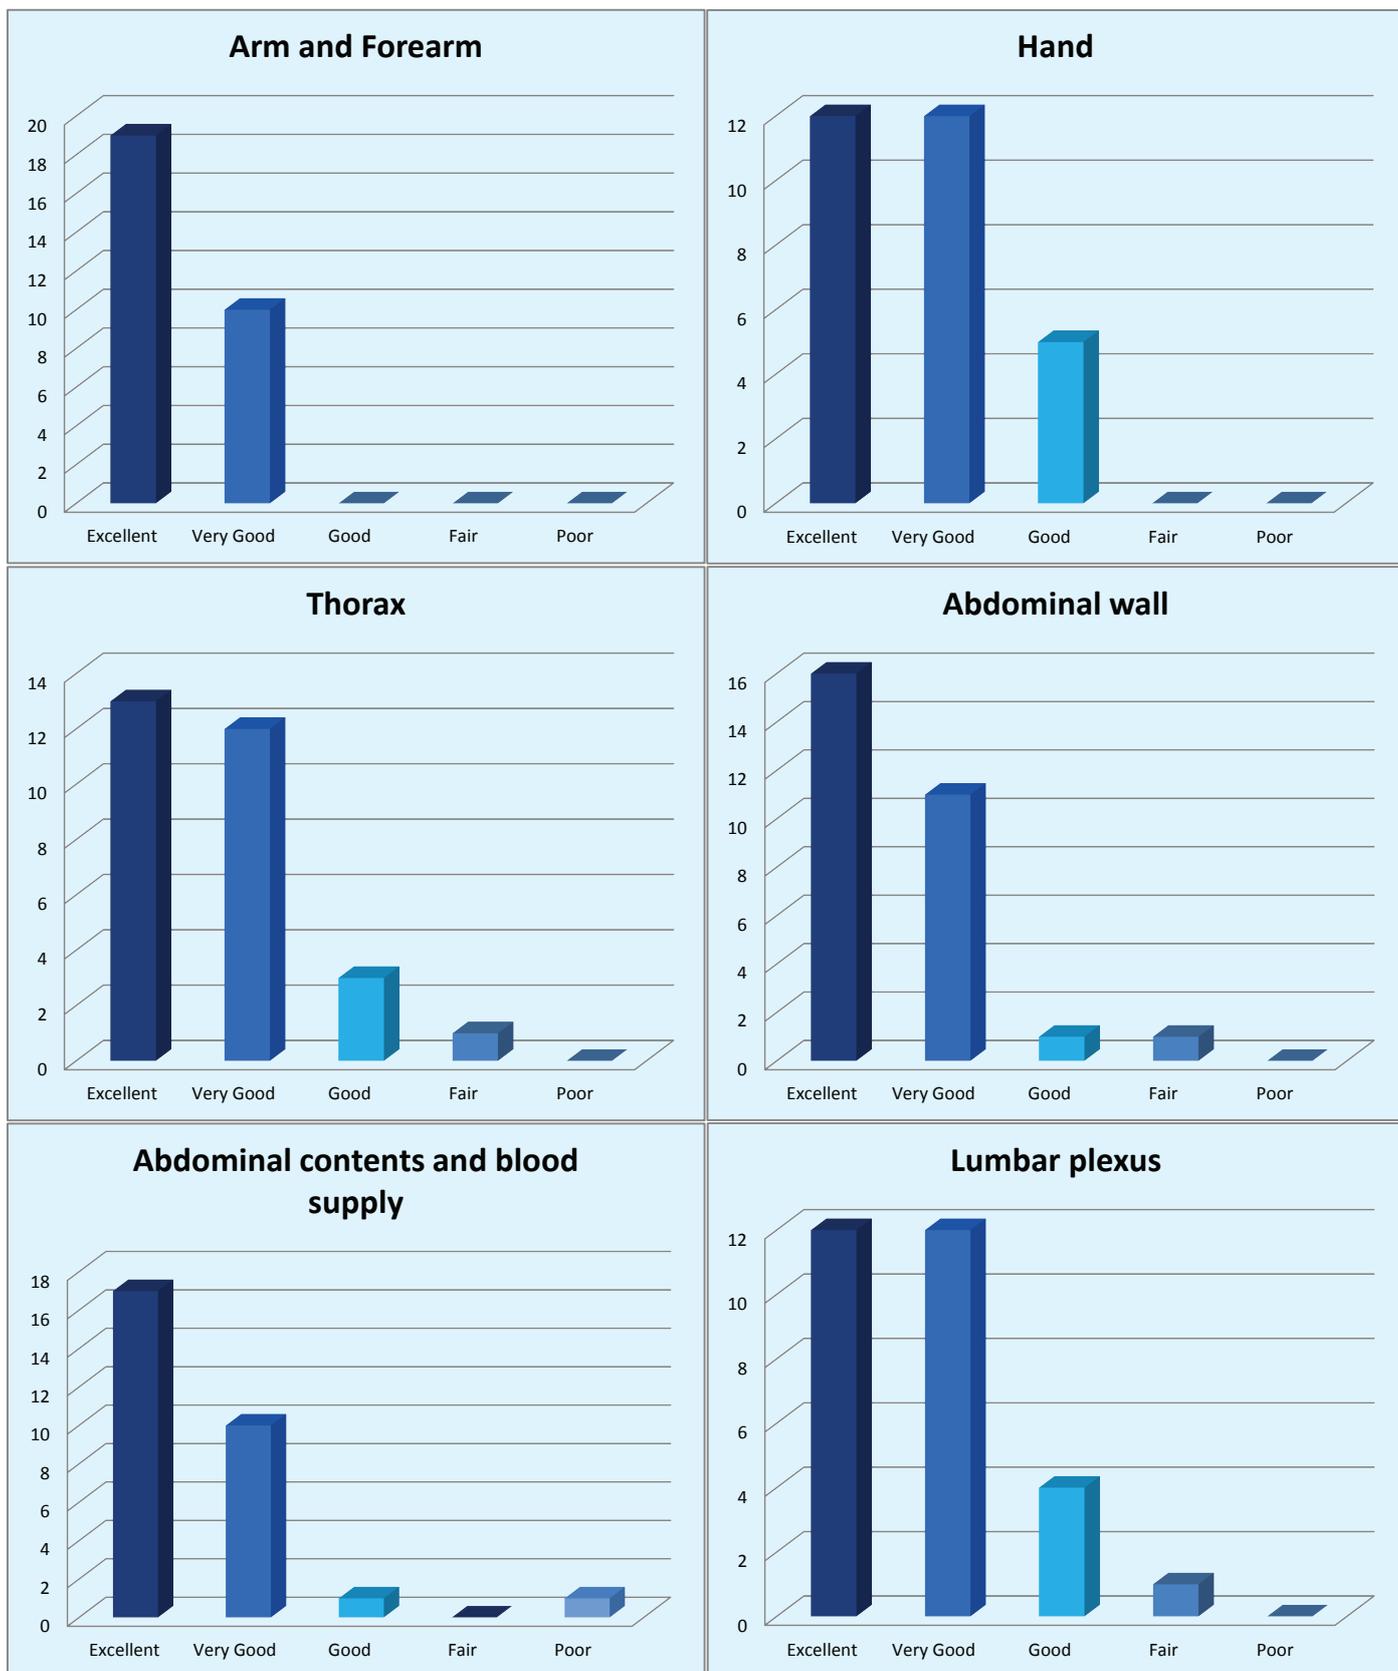

Neck

Brachial Plexus and Scapula

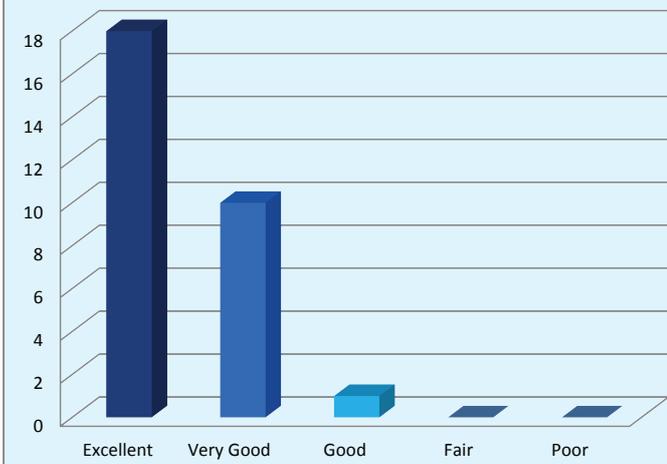

FEEDBACK

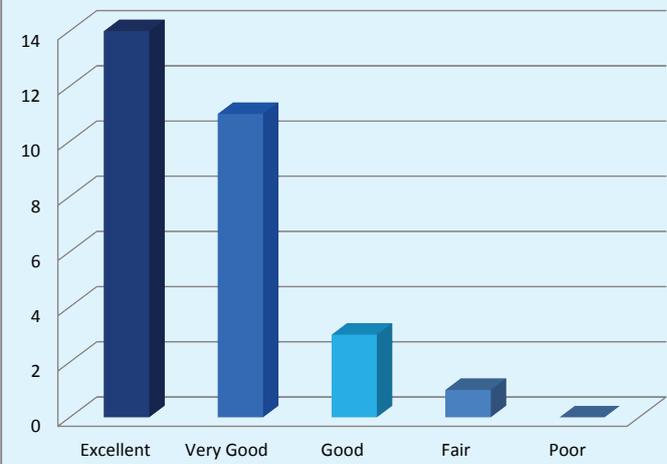

FEEDBACK

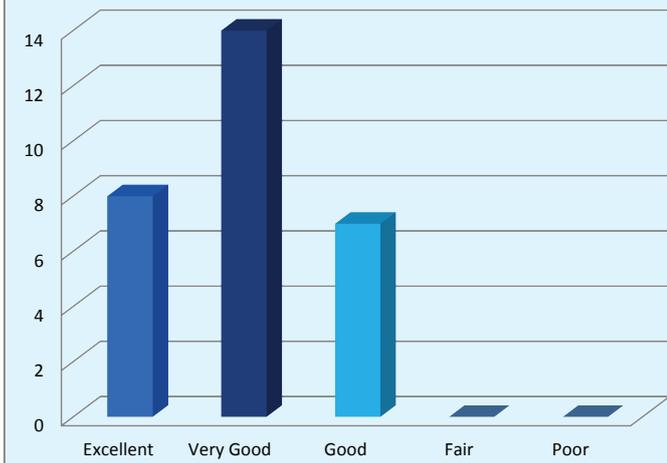

Femoral region and thigh

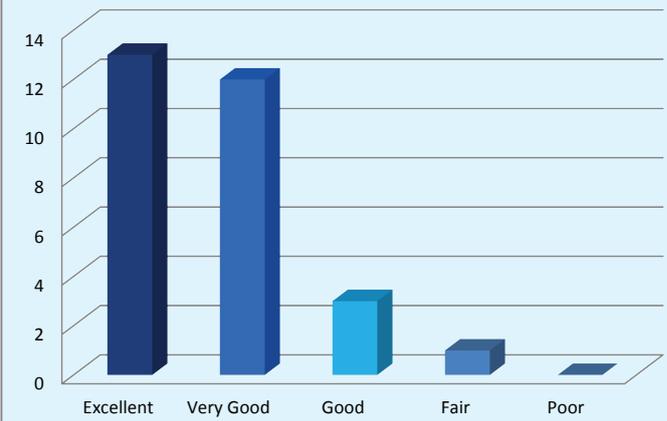

Lower leg and foot

Wound healing and local anaesthesia

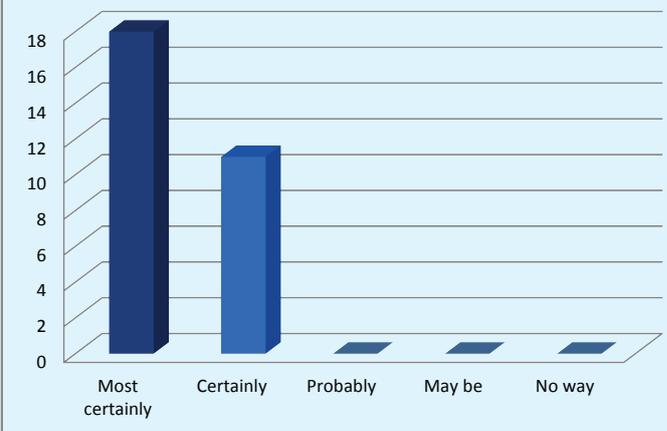

What was your impression of the venue and hospitality?

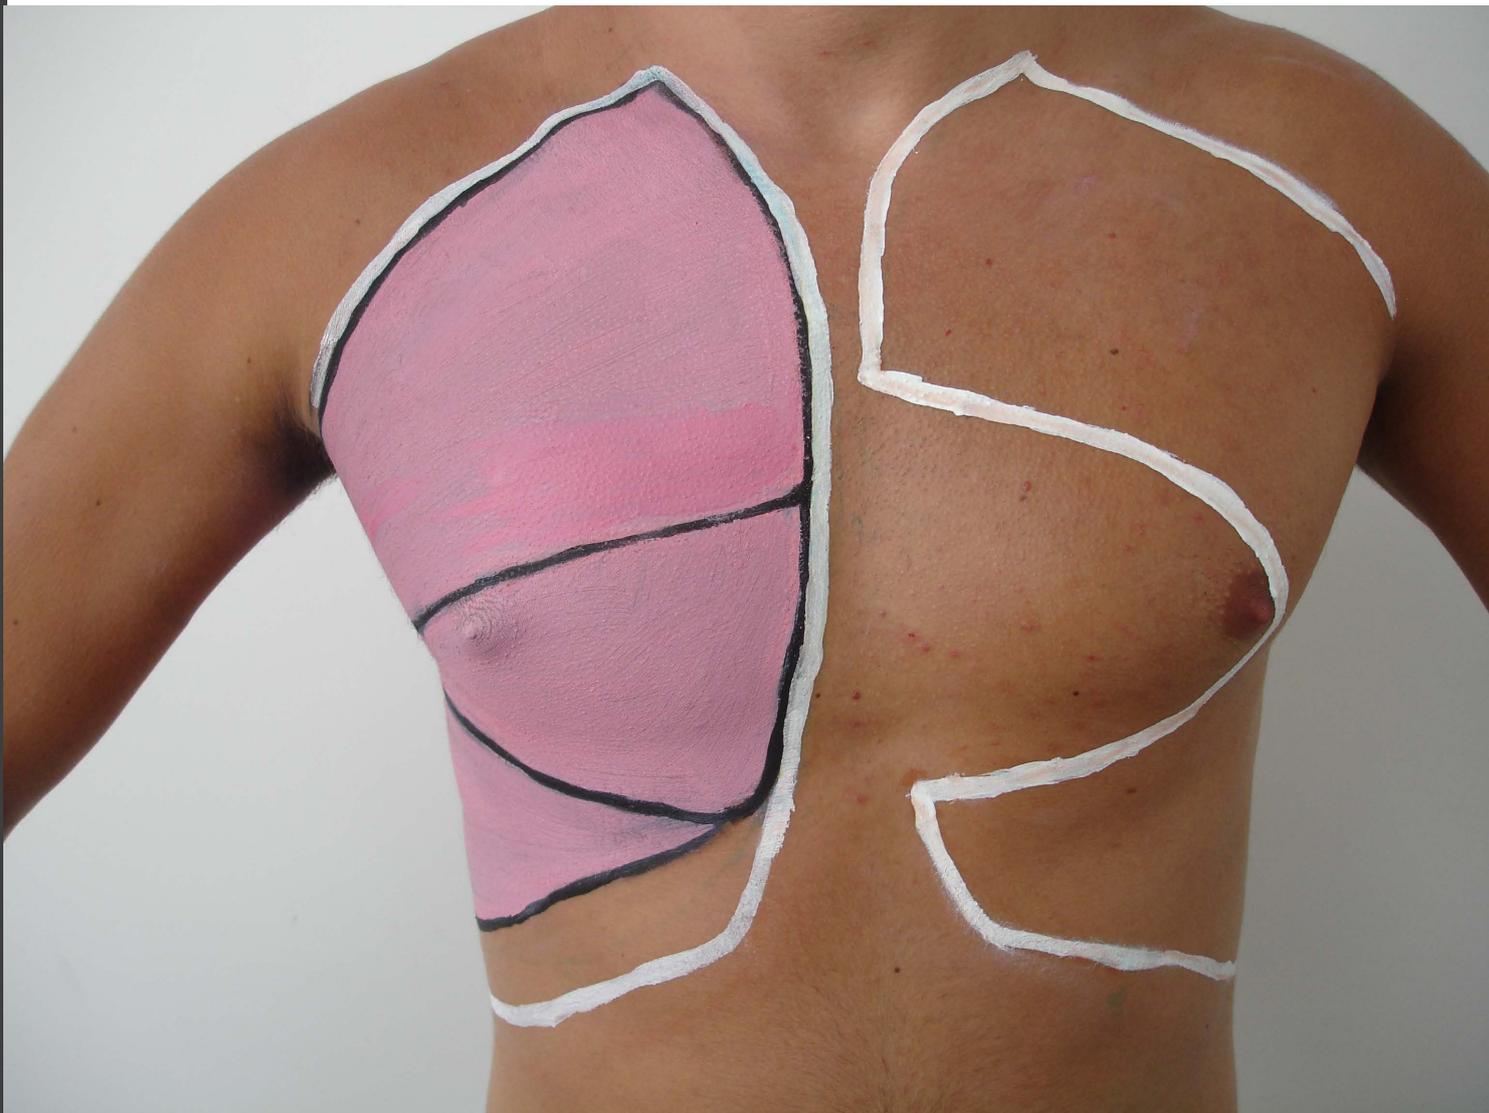

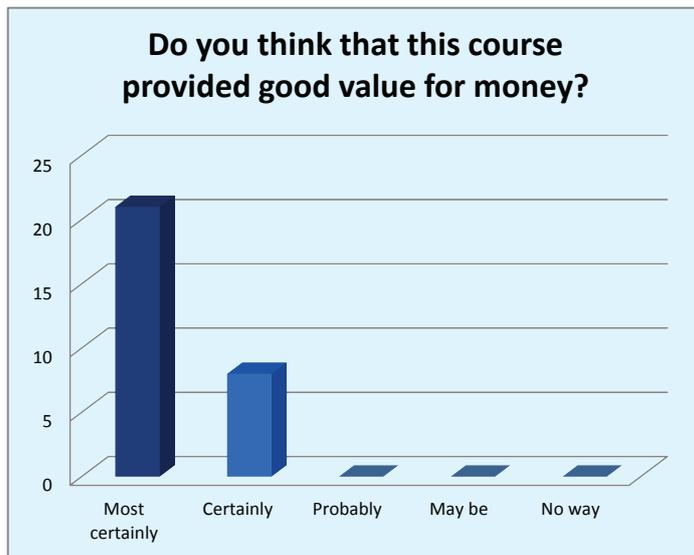

How were the refreshments and lunch?

Would you recommend this course to a friend?

FEEDBACK

COMMENTS

The course was really well organized. The lecturer was very good.

Mr. Sheraz Yasin
4th Year Medical Student
Barts and the London

Very good course and teaching.

Dr. Ahmad k . Abou-foul
John Radcliffe Hospital, Oxford

Overall the course was very useful. Good job by Doctors Academy. Thank you.

Miss. Don Bosco Cynthia Nishanthi
1st Year Medical Student
Barts and the London

It was a good session, though I feel it would have been better if it was groups of about 10 per lecturer.

Alechi Nduka

The course was very useful it taught me more than the undergraduate curriculum.

Mr. Stuart Stokes
5th Year Medical Student
University of Sheffield

Very good course. Excellent value for money. Available print outs of ppt presentations or comprehensive handouts would have improved the day. As would a few prosecutions to complement the surface anatomy. Would recommend.

Dr. Simon Tallowin
Foundation Year 2
Queen Elizabeth Medical Centre, Birmingham

Well organised, good use of a surface anatomy model, content was relevant to clinical practice

Dr .Oliver Hudson
1st Year Medical Student
Northern General Hospital, Sheffield

Very useful.

Mr. Prithvi Boyinapalli
5th Year Medical Student
Barts and the London

Excellent content and teaching quality. Highly useful. Difficult assessment!

Mr. Dylan Angel
Foundation Year 1
Barts and the London

COMMENTS

Great course, very pertinent to studies and extremely useful/helpful!

Muhammad Hyder Junejo

Was well organised and the teaching was great. Would have been better to spread the course over a weekend as there is a lot of information.

Ernest Lakovlev

Brilliant course overall - pitched at a good level + covered a good amount of information. I don't think this course however should be made available to medical students - I think having some clinical experience is fundamental to understanding the concepts and relevance of anatomy and being able to apply it clinically. But overall a really useful and interesting day. It has given me a great understanding which will help with MRCS revision, being able to teach others at a basic level and most definitely on the wards. Thank you so much!

Dr. Sita Shah

Foundation Year 2
Royal Albert Edward Infirmary, Wigan

Very impressed.

Miss. Rachel Gallears

4th Year Medical Student
University of Liverpool

Very good. Well done.

Dr. Wilson Chan

Foundation Year 2
Princess Royal University Hospital, Orpington

Excellent course , would highly recommend.

Mr. Daniel Hay

4th Year Medical Student
Imperial College London

Excellent course, I have never grasped anatomy properly until now. Great preparation for finals. Professor Enoch and the other trainees were friendly and approachable which made it very easy to ask questions.

Dr Sara Leddy

Foundation Year 2

I thoroughly enjoyed this course. The tutors were all very enjoyable. The lunch & snacks were excellent and I learnt a lot of anatomy. It is a very good way to teach what can be a very dry topic.

Ms. Rebecca Bradbury

5th Year Medical Student
Barts and the London

COMMENTS

Excellent teaching.

Miss. Jankee Patel
4th Year Medical Student
University of Liverpool

The course was very clear and informative. I learnt a lot and would recommend to my friends.

Miss. Thivya Thirukumar
5th Year Medical Student
Barts and the London

Very well run course- very informative and relevant for clinical practice. However, it would have been better to have slightly more time to read and answer the questions in the assessment- maybe a pre-printed paper to allow people to work through the questions at their own pace within a given time frame?

Dr. Carina Crouch
University College London

Excellent course! Great for an anatomy-phobe like me!

Mrs. Katherine Jack
5th Year Medical Student
Barts and the London

Very useful and appropriate for my stage

Mr. Bilal Gani Taib
5th Year Medical Student
University of Liverpool

Very good! Enjoyable as I like anatomy and was a good overall cover, more useful for being quizzed in theatre than (my university's) finals.

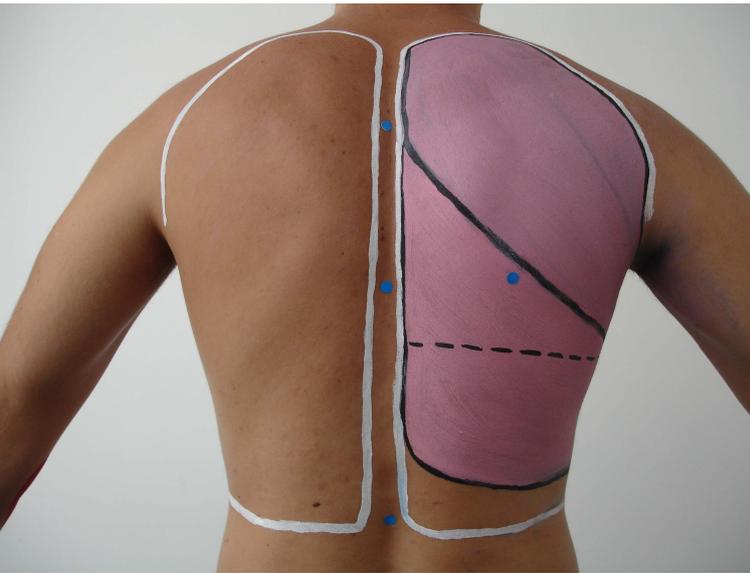

Miss. Lucy Grant
5th Year Medical Student
Newcastle University

Brilliant teaching; just a lot of information to take in in one day so may have been better to be a two day course.

Miss. Hayley Sommerville
4th Year Medical Student
University of Liverpool

Very good

Dr. Srividya Arya
Trust Grade Doctor
Croydon University Hospital, Croydon
